Dear Editor,

Please find the revision version attached with the accompanying response sheet, and here is the table of revision as requested by the reviewer.

Thank you,

Dr. Radjiman Ismail

RESPONSE TO REVIEWER-A

No	Reviewer's Comment	Response
		Thanks very much, dear reviewer, for your kind remarks and for allowing us to revise our manuscript. We are very grateful for all the valid and valuable comments. These helped us a lot to improve our work.
1	The abstract rewrites in the following headings: Purpose, Design/Methodology, Findings, Conclusion, and Practical Implications.	Dear reviewer, we have revised the abstract as suggested. Please see pages 1
2.	You have used this term throughout the document but have not defined it. Please define it for the benefit of your reader. PLS TAM	Many thanks, dear reviewer. We have now defined the said terminologies. SMARTPLS is a statistical tool and is used in its abbreviated form. For PSL-SEM, the explanation has been added. Please see page 5 For TAM (please see page no 2)
3.	In this section you need to specify what makes this study original. What have you done differently that hasn't been done before? Your contribution shouldn't be more than 50 words.	Dear reviewer, following your kind guidelines, we have now added the study contribution. Please see page 1
4.	Abbreviations in the brackets do not match with the words. You may change scale of system useability (SSU) please change in the whole text.	Many thanks, dear reviewer. Done as per your kind suggestion. Please see page 5
5.	Please explain table 1 in the text followed by a suitable verb in the present tense: e.g. Table 1 presents.	Done, dear reviewer, Please see page 6 Important Note: It is a humble request to please consider the original table 1 as the table your kind-self have changed is totally different and false. It presents the cross-loadings and is only used for factor

		lodgings (a primitive measure that is not our objective to calculate as we move to the next and reliable level). It does not reflect the AVE, CR, and CA values. Also, please note that we cannot calculate AVE, CR, and CA values item-wise. These are only calculated for whole variables as a combination of all items as presented in original Table 1. So please add here the original Table 1 sent in our previous version
6.	Please provide the full form of abbreviations variables in note of tables.	Done dear reviewer,
7.	Please provide the missing value of red question marked circle.	Dear reviewer, the R2 values only appear for dependent and mediatory variables based on the impact of any independent variables. As TSC, TSE, and TIRSS are independent variables, TS is a moderator variable (which are all predating variables), and no other variable impacts it. Therefore, there is no R2 value for this variable.
8.	Please provide the full form of abbreviations variables in note of figures.	Done, dear reviewer,
9.	Explain figure 1 in the text followed by a suitable verb in the present tense: e.g. Figure 1 illustrates, etc.	Done, dear reviewer, Please see page 6
10.	Please explain table 3 in the text followed by a suitable verb in the present tense: e.g. Table 3 presents.	Done, dear reviewer, Please see page 7
11.	References highlighted are incomplete. Please provide complete details.	Done, dear reviewer, Please see page 10

RESPONSE TO REVIEWER-B

No.	Reviewer's Comment	Response
1.	Please Check that given the names and surnames of the authors have been recognized properly and are presented in the preferred order.	Done, dear reviewer.
2.	Please check the English grammatical mistakes that highlighted in red color.	Done, dear reviewer.
3.	Please check the following references- (Hair et al. 2010) That have been cited in the text but not provided in the reference list. Provide these reference or remove them from text.	Added, dear reviewer, Please see page 10
4	In these references, Please add missing	Done, dear reviewer.
